Emergency Preparedness

CHIEF WARDEN TRAINING

Fully Compliant Chief Warden Training. Regular training for confident and effective emergency response management. Having skilled people able to safely conduct emergency evacuations is vital for protecting lives and property.

Designed and delivered by our highly qualified specialists, this course will provide participants with the skills and knowledge they need to fulfil their role as Chief Warden or Emergency Coordinator. Training complies with the requirements of AS 3745-2010: Planning for Emergencies in Facilities and AS 4083-2010: Planning for Emergencies - Healthcare Facilities.

We can come to your premise or conduct training online via our Live Web-based Training platform. We will provide all materials and supporting equipment required.

Training by the experts

Delivered by highly experienced and qualified experts (including certified fire and mechanical engineers), our programs are designed to prepare your occupants for the different types of emergencies, and to equip them with the knowledge and skills to respond safely and effectively to any emergency.

Training Outlines

Training will assist wardens on:

✓ Determining the emergency response procedures to implement

✓ Overall management and control of the incident until the emergency services arrive

✓ Course participants should not exceed 30 persons in the interests of ensuring good learning outcomes.

Who should attend?

This course is specifically designed for the Chief Warden, Deputy Chief Warden or Emergency Coordinator, who are required to respond to any type emergency in the workplace. This training is performed in conjunction with Warden/Emergency Officer Skills training and evacuation exercises, in order to form a fully trained and competent Emergency Control Organisation (ECO). Staff should take part in fire and safety training skills sessions at least every 6 months.

Duration

The course runs for approximately 60 minutes. The training covers the roles and responsibilities of the Chief Warden Group, coordinating the operations of an Emergency Control Organisation, Incident control, use of on-site communication & alarm systems, risk assessments, human behaviour in an emergency, liasing with attending Emergency Services and return-to-normal processes.
